**Paper.** We buy certain kinds of popular paper in volume at a reduced price. Ask us which paper we can offer at a discount.

**Simplicity pays.** Standard sizes cost less to buy, less to print and less to mail. Don't pick unusually sized paper. Stand out from the crowd by what you put on the page.

**Reduce or eliminate bleeds.** In printing terms, a bleed is where the colour or art goes right to the edge of the paper. We produce a bleed by printing on a larger size of paper, then trimming off the excess. This is labour intensive, requires a more expensive paper size and creates waste.

**Printing on both sides** of the sheet costs less than two single-sided prints. This saves paper too, making it the environmentally friendly choice.

**Quantity.** The more copies you print, the more money you save per copy. The price per item is greatly reduced by choosing longer print runs because less setting-up time is involved. Try to combine your orders. For example, if you need business cards, is there anyone else in your office running low? Combining two cards can save you up to 60%. Check on your letterhead, envelopes and flyers, too. There is often a savings to printing them all at the same time.

**Specials.** We regularly advertise specials. Take advantage of these. Call us or visit our web site. Easier still, sign-up for our bi-monthly newsletter, "PRINTWISE", and allow us bring our specials to you.

**Build a relationship with PrintFastic.** This will simplify order processing, save time and reduce stress for you. One email or phone call is often all we need to process your order, especially on repeat jobs. Time, after all, is money.
